

## FACILITIES PLANNING

The Board is responsible for the regular operation and orderly development of its facilities. For this reason, the Board will concern itself with both short- and long-range planning as it relates to the properties of the District.

The Board will develop a long-term building program to serve as a guide for capital improvements. This program will be subject to regular review and revision. The respective construction projects will be acted upon individually when proposed for implementation.

The Board-developed building program will be designed to provide adequate facilities to conduct educational programs for all students residing in the District. The building program will be based upon specific Board policies which have been, and will continue to be, modified to conform to changes in the curriculum, availability of construction funds, changes in enrollments and the results of annual evaluation of facilities. The Board will establish priorities using these and other relevant factors.
