

SCHOOL ATTENDANCE AREAS

The Board will determine attendance areas for the various schools of the District. Boundary lines will be recommended by the Superintendent, who will take into consideration the best use of school facilities, the equalization of enrollments in classrooms, natural barriers and traffic hazards and patterns.

Students are expected to attend the school in the area in which they live, with such individual exceptions as fall within the Board policy or may be made in the best interests of the student and/or the school.
