

STUDENT HEALTH SERVICES AND REQUIREMENTS

The Board recognizes the responsibility of the schools to help protect and improve the health of students. The services of a nurse or nurses will be available to the District. The principal is responsible for the administration of the health program in his/her school.

Of necessity, school health services must be limited to the prevention and detection of health problems, referral of problems through parents to the family physicians or community health agencies and emergency care.

Each school will have on file for each student an emergency medical authorization form providing information from the parent/guardian on how he/she wishes the school to proceed in event of a health emergency involving the student and authorization for the school in case emergency action must be taken. When a student is injured or becomes ill at school, the proper school authority shall, if deemed appropriate, notify the parent(s) and/or request emergency medical service. When a student has a medical emergency which cannot be effectively treated by school personnel, emergency medical services shall be requested on behalf of the student.
